OFFICE OF THE SECRETARY

BY HAND

Ms. Magalie Roman Salas
Secretary
Federal Communications Commission
445 12th Street, SW
Washington, DC 20054

EX PARTE OR LATE FILED

EX PARTE
PRESENTATION

Re: CC Dkt. No. 01-277

Dear Ms. Salas:

On October 12, 2001, John Ivanuska, VP Regulatory & Carrier Relations, and T.J. Sauder, Manager ILEC Performance Data, both of Birch Telecom, Inc., and Albert Kramer and the undersigned of this law firm met with Jessica Rosenworcel, Pamela Megna, Daniel Shiman, Aaron Goldberger, Renee Crittendon and Ian Dillner of the Common Carrier Bureau, and Allan Manuel of the Enforcement Bureau. We discussed BellSouth's application for 271 authority in Georgia. In particular, we discussed the deficiencies in BellSouth's OSS and performance reporting experienced by Birch. The attached materials, which summarize our presentation, were distributed at the meeting.

If you need any further information, or have any questions, please do not hesitate to call me.

Sincerely,

Jacob Farber

Birch Telecom

BellSouth 271 Application

Ex Parte Discussion with the FCC

John Ivanuska - VP Regulatory & Carrier Relations

T.J. Sauder - Manager ILEC Performance Data

October 12, 2001

Who is Birch Telecom?

**100% of our customers
fired [REDACTED].**

Your business' best friend.

**THE BIG PHONE COMPANY'S HOTSHOT
LAWYERS ARE TRYING TO KEEP US QUIET.**

Your business' best friend.

Who is Birch Telecom?

- A multi-region provider of local and LD voice and facilities-based data services
 - Nearly 300,000 access lines served in Southwestern Bell territory
 - Launched business UNE-P in BellSouth territory in late 2000 (GA, NC, SC, AL, TN)
 - Recently launched residential UNE-P in BellSouth territory
 - Birch provisions a very straightforward and simple set of POTS-based services in the BellSouth territory

- Note: As a CLEC actually doing business in the Southwestern Bell states, Birch played an active and formidable role with state PUC's, the FCC, and the DOJ in the Southwestern Bell 271 process, and ultimately supported Southwestern Bell's 271 applications in Kansas, Missouri, and Oklahoma.

Birch's Areas of Focus in BellSouth 271 Process at the State Level

- Forging an Acceptable Performance Measurement Framework
 - Georgia's PM framework is less rigorous than the "template" PM framework required for Verizon and SWBT entry
- Empirical Validation of BellSouth's Actual Performance Under the Performance Measurement Framework
 - Georgia never validates an acceptable PM framework, and what was "validated" is woefully incomplete
 - **The level of BellSouth performance is being materially overstated**
- Post-271 Enforcement Mechanisms
 - Georgia's existing mechanism lacks the focus and urgency inherent in the SWBT states' enforcement mechanisms

The Georgia 271 application not only ***fails*** in the 3 areas of deficiency identified by Birch, but several additional ***key tactical failure points*** have also been identified through Birch's commercial experience

- Birch's evaluation of BellSouth's reported performance data shows that BellSouth has recently begun materially misrepresenting its actual order "flow through" performance.
 - BellSouth's reported **% Flow-Through** of Birch orders (UNE-P) for July and August 2001 is materially overstated (mid-high 90s% flow-through) compared to Birch's commercial experience (55-60% range) and compared to prior months' reported results by BellSouth (consistently in the 55-60% range throughout 2001).
 - Birch's evaluation of the underlying detail uncovered numerous instances of erroneous initial FOC responses that are processed electronically, and then are subsequently modified, and thus manually handled.
 - BellSouth only reports the initial erroneous FOC response and ignores the fact that the order requires manual handling.
 - This accounts for an **additional 10%** overstatement of BellSouth's reported % flow through.

Result: BellSouth has failed to satisfy Checklist Item #2.

The Georgia 271 application not only ***fails*** in the 3 areas of deficiency identified by Birch, but several additional ***key tactical failure points*** have also been identified through Birch's commercial experience (cont'd)

- BellSouth's calculation of **Average Completion Interval** does not reflect the actual customer experience on an order, and is inconsistent with FCC direction in prior BellSouth 271 petitions regarding the business rules for this measure (*Louisiana I* at ¶ 41; *Louisiana II* at ¶¶ 129, 130; *South Carolina* at ¶ 136).
 - Birch's evaluation of BellSouth's reported provisioning performance data uncovered additional BellSouth-introduced errors on service orders
- BellSouth has failed to maintain a **reliable OSS**, and lacks any sense of urgency in addressing high impact problems through the **Change Control Process**.
 - Ineffective issue resolution through Change Control
 - BellSouth's sworn testimony in this proceeding (see affidavit of Wm. Stacy, ¶ 356) does not reflect the severity of its OSS failures, and Birch's attempts at recovery efforts are repeatedly frustrated by BellSouth.

Result: BellSouth has failed to satisfy Checklist Item #2.

BellSouth's performance deficiencies and recent failures will continue to have a material impact on Birch's commercial performance, and on Birch's ability to compete effectively

- UNE flow-through is the single most significant indication of provisioning quality
 - Poor flow-through performance serves as a gauge that can (and does) indicate a wide range of deficiencies in BellSouth's OSS and deficiencies inherent in manual provisioning
 - Manual handling of orders by BellSouth has affected the timeliness of the provisioning of service to Birch, the accuracy with which a Birch order is provisioned by BellSouth, and the productivity (cost-effectiveness) of the Birch provisioning process.
- With Performance Measurements being the only generally recognized empirical measure of BellSouth's performance in a post-271 environment, BellSouth-generated "false positives" constitute a devastating obstacle to the truth.
 - Birch is working to refine the PM Framework at the state level, but the BellSouth states have employed a formal regulatory approach versus a less formal and more productive "collaborative" approach to derive PM improvements. This hinders true progress.
- BellSouth's failure to adequately operate its OSS can render (and has rendered) the BellSouth/Birch provisioning interfaces inoperable, and causes Birch to abandon those systems and manually "hand hold" the orders.
 - Poor flow-through, Change Control failures, false information, e.g., erroneous FOC dates, etc.

Birch Recommendations to the FCC

- Birch will request that, prior to approval, the FCC:
 - Require modifications to the BellSouth PM framework to establish standards of performance that are consistent with other RBOCs that have been granted 271 authority
 - Require an empirical validation that BellSouth is performing at a level that meets these standards of performance
 - Require that BellSouth's reported performance be fully consistent with its actual performance
 - Require an empirical validation that BellSouth is accurately reporting its actual performance
- Birch is prepared to work in conjunction with the FCC and DOJ to lend expertise in evaluating BellSouth's performance as a vendor to CLECs.

Final Words...

-
- Birch is “on the record” at the FCC as supporting Southwestern Bell’s 271 Petitions in Kansas, Missouri, and Oklahoma.
 - Birch views BellSouth as a key strategic business partner and is not interested in preventing BellSouth from entering the interLATA long distance market indiscriminately.
 - Birch’s only objectives in this proceeding are to bring about a competitive framework and operational procedures that will give Birch a meaningful opportunity to compete effectively.

Note: While BellSouth’s market share loss is an issue, it must be factored against the actual commercial experience of CLECs like Birch that struggle inordinately to gain and maintain customers against a backdrop of hindrances set forth by BellSouth. With such a high degree of manual handling by BellSouth, CLECs’ performance can be dramatically hampered through human intervention - deliberate or otherwise.

REPORT NAME: CLEC LSR Information
REPORT PERIOD: 07/01/2001 to 07/31/2001
CLEC: 1986 --

NOTES FOR REPORT ON CLEC LSR INFORMATION

This report contains information on all mechanically submitted, non-LNP LSRs that BellSouth processed for your company during the period noted above. For the purpose of this report, an LSR is a distinct cc/pon/ver combination. The data presented has several lines per LSR and where more than one line is needed to determine the status of an LSR (e.g., an LSR flows through when certain conditions are found/not found on three lines), it's still counted as one LSR. Each different version of a particular PON is considered a separate LSR within BellSouth. Below, you will find explanations for each column and its contents.

CC -- Your company code.

PON -- Your purchase order number as received on the LSR.

VER -- The LSR version.

TIMESTAMP -- Timestamp of note or error posting in LEO database.

TYPE -- Notes type. See explanations of each type in the next section.

ERR# -- ENCORE error number. Please refer to your LEO Implementation Guide for complete explanations of each error number.

NOTE OR ERROR DESCRIPTION -- Actual text of the note or error as found in the LEO database.

When comparing the results of this LSR information file with the flow through aggregate report, please note that this LSR Information file contains LSR data for all submission types, (LENS, EDI, TAG), but are separated by cc while there's a separate line for each submission type on the aggregate report, the intent of this LSR information file is for the reconciliation for all LSRs submitted regardless of submission type.

NOTES TYPES EXPLAINED

There are several different types of notes, each with its own unique identifier. Many of these are internal to BellSouth, and will not be useful to you. Others will tell you immediately the type of note that you are viewing. For example, a type of 'C280' refers to an internal BellSouth program which generated the note text, and 'ERR' means that the note text contains an actual error message.

Please note that each LSR may receive multiple errors and messages. All errors and messages must be taken into account in order to determine the treatment for that particular LSR.

TYPE	EXPLANATION
C###	Refers to the actual BellSouth program that generated the note text
CANC	Automatically cancelled by system due to inactivity
CLAR	Clarification message
CLM	LSR has been claimed
CRR	Mechanically generated order has been corrected
ERR	The notes field contains an error message, and the ERR# field is populated
FCCN	Manual FOC send
ISS	Manually issued order
LOAD	Successful change in the LEO database
MECH	Means that the LSR in question was received via a mechanized method
NAVI	Navigation message -- where the LSR was sent at that time
RETF	Return feed
SRET	SOCS return message
SGNT	LSR has been inserted to TSIGNOUT queue and is waiting to be claimed
WEB	Message is posted to the web (LENS)

FLOWTHROUGH LOGIC

This section contains an explanation of the process by which BellSouth determines whether or not an LSR has flowed through the system. Please note the following: as each of the flowthrough steps is executed, LSRs that meet that step's criteria are removed from the base pool of LSRs, and are not included in any further calculations. For example, an LSR with both an auto clarification and a MANUALP fallout condition will be counted only once in the flow through calculation. In this example, the LSR will appear in the planned manual 'bucket' since the manual fallout step is executed before the auto clarification step. In addition, an LSR with more than one error of the same type, e.g., auto clarification, will be counted only once in the flow through calculation. A list of all errors by error code and quantity can be found in the Flow Through Error Analysis report.

The steps for determining flowthrough are as follows (in order):

FATAL REJECTS

Finds all fatal reject records. A fatal reject is a record the system identifies as having severe CLEC errors that prohibit further processing and is returned to the CLEC. Fatal rejects are identified by looking for a note containing 'LSR REJECTED' and a note type of 'RETF' or 'C475', both of which indicate an LSR was rejected by the system. A fatally rejected LSR does not retain its initiating source system ID (i.e., LENS, EDI, TAG); therefore, it is impossible to determine the source of a fatal reject. Please note that fatal rejects are not a part of the flow through calculation and are NOT identified in this report.

AUTO CLARIFICATIONS

Finds all auto clarification records. An auto clarification record is a record the system identifies as having a CLEC error and returns the record to the CLEC with no further processing. All auto clarification LSRs contain the words 'AUTO CLARIFICATION' in the notes field.

PLANNED MANUALS

Finds all planned manual and manual clarification records. A planned manual LSR is an LSR that the system is not designed to handle mechanically due to its complexity. As a result, the LSR falls out for manual handling so that processing can be completed.

A planned manual LSR will have the text 'MANUALP' as the first seven characters of the notes field.

FLOWTHROUGH LSRs

Finds all records that have had service orders issued in SOCS, i.e., all records that flowed through the system. An LSR is defined as having flowed through if the following logic is true:

* The note contains the text 'FOC STAGED FOR LSR' ***OR*** 'FOC AND CN STAGED FOR LSR'

AND

* The note contains the text 'ORDER NUM' ***OR*** 'INFO-ORDER' ***OR*** 'CANCELLED'

SYSTEM FALLOUT

Any LSRs that did not flow through the systems and were not planned manuals, fatal rejects, or auto clarifications are defined as system fallout.

CLEC CAUSED FALLOUT

CLEC caused fallout is defined as those LSRs with clarifications returned and/or clarifications posted.

CLARIFICATIONS RETURNED

Find all clarification returned LSRs. A clarification returned designation indicate that an LSR was received and was LESOG eligible, but could not flow through because additional information was required in order to process the LSR. The LSR requires a Bellsouth representative to review it; if the error is determined to be a CLEC error, the LSR is clarified back to the CLEC. This LSR contains the text 'CLARIFICATIONS RETURNED' in the notes field.

CLARIFICATIONS POSTED

Finds all clarifications posted LSRs. A clarification posted is identical to a clarification returned except that the clarification is posted to the web (LENS) rather than being sent to the CLEC via EDI or TAG. A clarification posted LSR contains the text 'CLARIFICATIONS POSTED' in the notes field.

BST CAUSED FALLOUT

All other LSRs that fall out of the system are counted, by default, as 'BST Caused Fallout'.

PENDING (Z) STATUS LSRS

There is no specific identifier in the tables which indicates that a LSR has received a 'Z' status. When a supplemental LSR is received before the original LSR has reached FOC status, the original LSR is marked with a 'Z' status. LSRS that receive this 'Z' status are excluded from the flowthrough calculation.

LSRS AND ASSOCIATED MESSAGES FOR THIS PERIOD

LIST OF LSRS WITH ACTIVITY DURING THE MONTH THAT WERE INCLUDED IN THIS MONTH'S FLOW THROUGH CALCULATION.

The following is a list of the LSRS originated this month and included in the flow through calculation, and all messages associated with each LSR received. Again, please remember that you must take into account all the messages and errors for each LSR to determine its treatment.
